Name: Julieza Jane Bella A. Raper
BSCS3A

List down/ take down notes on what you have gained from the Seminars/ Webinars/ Workshops

- I was able to understand the current state of gender diversity in the technology industry, including the challenges that women face in this field.
- I learned to give importance more to the representation of women in technology and programming, and the benefits this can bring to the industry and society as a whole.
- I was able to witness and influence successful women in technology and programming about their experiences and insights into how to overcome gender barriers in the industry.
- I learned to explore more strategies for promoting gender diversity and inclusivity in the workplace, including policies around recruitment, retention, and advancement.
- I learned and understand the impact of unconscious bias on women's experiences in technology and programming, and how to address and mitigate these biases.

Photos/screenshots of event participation
- *I would like to inform you Ma'am Shen that I love to share and send a screenshot here but I as I scroll down to my gallery I was not able to find it anymore, however, I do assure you that I attended the seminar because there are giving me a certificate of participation.*
